

➤ **PRODUCTS** ➤ **PLASTIC CASES** ➤ **Injection-moulded** ➤ **K-Serie**

The universal plastic-case range

That newly developed case class is a low cost but nevertheless a very robust class made from polypropylene.
By the rectangular inside it is especially adapted for standardized thermoformed inserts.

The result is a very favourably-priced mean of packing for a wide field of applications without tool costs and available from stock in more than 100 variations.

- Material PP
- Injection-moulded plastic-case
- Elegant in optic

options:

- Conductible ESD
- Case available in two colours
- diverse standard thermoformed inserts
